DISCUSSION

As explained by the Korean Patent Examiner in the *Notice to Submit Response* issued on the 30th of December 2002, Maenozono '159 Japanese patent publication was set by the Korean Examiner to disclose "a printing position adjusting device of a printer such the when a contraction printing mode is set in a printer, a paper size, a printable range, and information of a printing image of contraction printing are transmitted to a printing position adjusting means."

The Korean patent Examiner also explained in the *Notice to Submit Response*, that the Kuroda '367 Japanese patent publication "discloses a method for controlling a printer including an image memory for storing received data, an operating section designating print position alteration for a sheet, and an image processing section for modifying the layout of a stored print data."

The citation of forgoing references is not tended to constitute representation to the Examiner

that a search of the prior art has been made by the Applicant. Accordingly, the U.S. Examiner is requested to make a thorough and wide-ranging search of the prior art during the examination.

Pursuant to 37 C.F.R. § 1.97(e), the undersigned attorney hereby certifies that each item of information contained in this Information Disclosure Statement was cited in a communication from a foreign patent office in a counterpart foreign patent application not more than (3) months prior to the filing of the statement. Accordingly, no fee is incurred by this Statement.

Respectfully submitted,
